Technical Skills

Strong | JavaScript (ES6) • Git • React.js • Material UI • Node.js • Backbone.js • Angular 5+ • AngularJS • Jest
Experienced | Webpack • Grunt • Gulp • Jasmine • Chai • Sinon • Postgres • MongoDB • GraphQL • Python • Bash

Experience

Khoros | *Customer Engagement Platform* | Software Engineer II - Frontend   **Austin, TX | 08/19 - present**
  > Onboarded and began making meaningful contributions to production code within two weeks of start date
  > Support and contribute to frontend repos across the company as one of very few frontend engineers
  > Consistently show flexibility by being able to join new teams and contribute to different codebases
  > Keep repositories up to date through dependency upgrades and replacement of outdated deps/practices
  > Work closely with designers to produce modern, visually appealing, user-friendly UIs for the Khoros platform
  > Integrate and duplicate various UI/UX techniques utilized by leading social media platforms
  > Contribute to and lead Frontend Guild Meetings where engineers share knowledge and discuss bleeding edge tech

Kapsch TrafficCom | *Intelligent transportation systems* | Software Engineer (UI/UX)   **Austin, TX | 03/18 - 08/19**
  > Worked with a team of engineers to develop a suite of maintenance and reporting tools for toll road operators
  > Built an Angular 5+ application from the ground up to replace existing legacy (jQuery/AngularJS) applications
  > Contributed to preliminary design meetings (UI, MW, and DB) when tasked with implementing a new feature
  > Interfaced with individuals from MW and DB teams on a daily basis to discuss implementation of new features
  > Led (and documented) daily stand-ups and scrum meetings for the UI/UX team
  > Travelled to client sites during preliminary design stages to discuss and demo features of our products in-person
  > Wrote and edited design documentation according to requirements agreed upon between Kapsch and clients
  > Periodically presented and discussed in-progress features with clients to confirm requirements are being met

Hack Reactor | *Advanced Software Engineering Immersive* | Lead Instructor   **Austin, TX | 05/16 - 03/18**
  » Managed the Instruction Team for the Austin campus and gave final approval on local curriculum changes
  > Conducted daily technical lectures on fundamental computer science and software engineering topics
  > Developed curriculum and contributed to the in-house projects which were used daily at Hack Reactor
  > Spent hundreds of hours debugging code with/for students and refactoring/explaining best practices
  » Taught MakerPrep, an intro to functional programming in Javascript, to a wide range of technical backgrounds
  > Conducted technical interviews for prospective students and recommended final admissions decisions

Projects

Greenbelter.io | Personal Project | React • Node.js • Amazon Web Services | greenbelter.io
Check the water level and flow at the Barton Creek Greenbelt along with directions to every swimming hole

Dalyhabit.com | Personal Portfolio Website | HTML • CSS • Serverless | dalyhabit.com
A simple, clean personal webpage developed using only HTML and CSS. Fully responsive and super efficient.

Education

MakerSquare (Hack Reactor) | Advanced Software Engineering Immersive   **Austin, TX | 02/16 - 05/16**
The University of Texas | BS Petroleum Engineering | Business Foundations   **Austin, TX | 08/10 - 05/15**

Personal

Achievements | Speaker at Developer Week Austin 2017 • Largest contributor to a repo featured on HBO's Silicon Valley
Skills | Fluent in Spanish • Expert with DSLR Cameras • Division 1 in FIFA Online • Efficient autonomous learner
Hobbies | Travel • Photography • Soccer • Cycling • Snowboarding • Basketball • Volleyball • Camping • Gaming
