Technical Skills

Strong | JavaScript • Git • React.js • Sass • Node.js • Backbone.js • Angular 5+ • Webpack • Jest • Enzyme
Experienced | CircleCI • Grunt • Gulp • Jasmine • Chai • Sinon • Postgres • MongoDB • GraphQL • Python • Bash

Experience

Khoros | *Customer Engagement Platform* | Senior Software Engineer - Frontend   **Austin, TX | 08/2019 - present**
- Onboarded and began making meaningful contributions to production code within two weeks of start date
- Support and contribute to frontend repos across the company as one of very few frontend engineers
- Consistently show flexibility by being able to join new teams and contribute to different codebases
- Keep repositories up to date through dependency upgrades and replacement of outdated deps/practices
- Work closely with designers to produce modern, visually appealing, user-friendly UIs for the Khoros platform
- Integrate and duplicate various UI/UX techniques utilized by leading social media platforms
- Contribute to and lead Frontend Guild Meetings where engineers share knowledge and discuss bleeding edge tech
- Refactored an existing NavBar to make it usable by all existing and future products to be acquired by the company
- Led initiatives from design to completion which affected all current and future customers using the product

Kapsch TrafficCom | *Intelligent transportation systems* | Software Engineer (UI/UX)   **Austin, TX | 03/2018 - 08/2019**
- Worked with a team of engineers to develop a suite of maintenance and reporting tools for toll road operators
- Built an Angular 5+ application from the ground up to replace existing legacy (jQuery/AngularJS) applications
- Contributed to preliminary design meetings (UI, MW, and DB) when tasked with implementing a new feature
- Interfaced with individuals from MW and DB teams on a daily basis to discuss implementation of new features
- Led (and documented) daily stand-ups and scrum meetings for the UI/UX team
- Traveled to client sites during preliminary design stages to discuss and demo features of our products in-person
- Wrote and edited design documentation according to requirements agreed upon between Kapsch and clients

Hack Reactor | *Advanced Software Engineering Immersive* | Lead Instructor   **Austin, TX | 05/2016 - 03/2018**
- Managed the Instruction Team for the Austin campus and gave final approval on local curriculum changes
- Conducted daily technical lectures on fundamental computer science and software engineering topics
- Developed curriculum and contributed to the in-house projects which were used daily at Hack Reactor
- Spent hundreds of hours debugging code with/for students and refactoring/explaining best practices
- Taught MakerPrep, an intro to functional programming in Javascript, to a wide range of technical backgrounds
- Conducted technical interviews for prospective students and recommended final admissions decisions

Projects

Greenbelter.io | Personal Project | React • Node.js • Amazon Web Services | greenbelter.io
Check the water level and flow at the Barton Creek Greenbelt along with directions to every swimming hole.
Dalyhabit.com | Personal Portfolio Website | HTML • CSS • Hosted on Github Pages | dalyhabit.com
A simple, clean personal webpage developed using only HTML and CSS. Fully responsive and super efficient.

Education

MakerSquare (Hack Reactor) | Advanced Software Engineering Immersive   **Austin, TX | 02/2016 - 05/2016**
The University of Texas | BS Petroleum Engineering | Business Foundations   **Austin, TX | 08/2010 - 05/2015**

Personal

Achievements | Speaker at Developer Week Austin 2017 • Largest contributor to a repo featured on HBO's Silicon Valley
Skills | Fluent in Spanish • Expert with DSLR Cameras • Efficient autonomous learner • Division 1 in FIFA Online
Hobbies | Travel • Photography • Volleyball • Cycling • Snowboarding • Basketball • Soccer • Camping • Gaming
